† Estimates based on survey of rice millers and marketers and certified seed acreage conducted by the Rice Experiment Station, Biggs, CA.

‡ Estimated acreage of all classes of certified rice seed with calculated variety percentage estimate based on seed acreage.

§ Estimates of total rice acreage based on rice miller and marketer survey and seed acreage. This is only an estimate base on a survey. Approximately 1/3 2004 acres has to be estimated and there are no guarantees on the accuracy of this information presented above.

¶ Other varieties include: Short Grains S-201 , Calhikari-201 , M-207 and proprietary and specialty varieties.
